📌 Hi, From Ribhu and Susmita 👋

Why Should You Trust Us?

We're not just sharing theory — we've lived this journey ourselves.
Here's why you should believe in what we're offering:

- We've cracked 40+ LPA software jobs in top product-based companies.

- We've cracked IITs and know what it takes to stand out in highly competitive environments.

- Susmita has built over 10 apps — published and live on both the App Store and Play Store.

- She's also cracked 7+ startup companies and is deeply active in the freelance and startup community — helping, collaborating, and growing alongside founders and tech innovators.

- We've mentored students, professionals, and aspiring developers who've gone on to land jobs at FAANG-level companies, successful startups, and fast-growing product firms.

Since we've established credibility and walked the path ourselves, we know exactly what works and what's just noise.

Now, let's get started — and help you build the same kind of success story. 🚀

ATS RESUME GUIDE TO 10X YOUR INTERVIEW CALLS
Resume Guide
(This guide has helped our 100+ students get interview calls from top MNCs/startups)

🚀Company Not asking DSA For Some Roles

Please treat everything with caution, as interview processes **vary by role/team/location** and **can change over time**.

#	Company	What's reported about their interview (DSA-light / relative emphasis)	Typical rounds / interview structure reported	Career-portal / apply via info
1	Razorpay	Some blogs list it among companies with less heavy DSA for certain roles. But reports show Medium/Hard DSA still present. ([GeeksforGeeks](#))	Typical: Online Assessment → Technical Rounds (1-2) → Managerial / HR. For SDE1: 3 rounds reported. ([GeeksforGeeks](#))	[Razorpay Career Portal](#)
2	Treebo Hotels	Cited in some blog-lists of startups "hiring without heavy DSA" for some roles. (Less detailed interview structure available)	Not much detailed public data for rounds.	[Treebo Hotels Career Portal](#)
3	CRED	Fintech startup. Reports show machine-coding + system design + DSA for many roles — so not strictly "no DSA". ([Glassdoor](#))	Reported structure: ~4-5 rounds: Coding/DSA → Machine coding → Tech discussion → Hiring manager + HR. ([Glassdoor](#))	[CRED Career Portal](#)
4	ThoughtWorks	Some roles reportedly emphasise home assignment / pair programming rather than pure algorithm puzzles.	For relevant roles: Possibly take-home coding/home assignment → Tech discussion → HR.	[ThoughtWorks Career Portal](#)

5	BrowserStack	Listed in blog-lists of companies with "no DSA at all" for certain roles. (Again: role/team dependent)	Likely: Coding/feature implementation/real-world problem round → Tech discussion → HR.	[BrowserStack Career Portal](#)
6	Zerodha	Mentioned in blog as a company with no heavy DSA for certain engineering roles.	Public detailed round info scarce.	[Zerodha Career Portal](#)
7	Atlan	Data-platform startup referenced as "no DSA-based interviews" in one blog for certain roles.	Detailed round info limited.	[Atlan Career Portal](#)
8	Stripe	Global company; blog cites some teams with no heavy DSA rounds. (But many teams still heavy)	Depending on team: possibly take-home/feature build rounds + system design + behavioural.	[Stripe Career Portal](#)
9	ACKO General Insurance Limited ("ACKO")	Added as you noted. Some reports show multiple rounds including coding/design. In some roles less heavy DSA, but not guaranteed.	Examples: 2-6 rounds reported: exploratory → coding round → design → product → hiring manager → HR.	[Acko Career Portal](#)
10	Quizizz	Ed-tech startup; reported to use phone interview, assignment, pair-programming rather than heavy DSA for some roles.	Likely: screening → coding/feature assignment → tech discussion → HR.	[Quizizz Career Portal](#)

📝 Notes

For each company you apply, preparing for at least these rounds will help:

- **Coding/Problem solving** (even if light)

- **Machine coding / take-home / feature development assignment**

- **System / component design** (especially for mobile)

- **Project & stack deep dive** (your past work, your projects)

- **Behavioural / HR / culture fit**
